# Subject Index to Volume 14

Abdomen, irradiation, glutamine nutrition therapy, rat, 106S
Acetate, metabolic and intestinal effects, 181S
Acid maltase deficiency, treatment with branched-chain amino acids, 210
Acidosis, interorgan glutamine metabolism during, 77S
Acivicin, tumor stabilization by, during total parenteral nutrition, rat, 122
Age, postoperative energy balance and, femoral fracture, elderly patients, 563
AIDS
  dietary intake in patients with, nutritional status and, 605
  home total parenteral nutrition, effect on body composition, 454
Albumin, serum levels, enteral nutrient solution tolerance and, 362
Alpha-Tocopheryl acetate, intraperitoneal, tocopherol levels after, blood and tissue, rat, 74
Aluminum, tissue accumulation, renal compromise or immaturity related to, letters, 106
American College of Physicians, position paper on parenteral nutrition in patients receiving cancer chemotherapy, letter, 434
American Society for Parenteral and Enteral Nutrition
  presidential address, 329
  14th Clinical Congress Abstracts, 7S
Amino acids
  branched-chain
    acid maltase deficiency treated with, 210
    liver failure patients, 249S
    optimal concentration, injured rat, 156
    optimum concentration, sepsis treatment, rat, 398
  homeostasis, role of lungs in maintenance of, rat, 569
  metabolism, posttraumatic, glutamine role, skeletal muscle, 125S
  parenteral, nucleic acid labeling and, protein-deprived rat, 490
  renal losses, anabolic steroids and, polytrauma patients, 111
Ampicillin, pharmacokinetics, during parenteral nutrition, 279
Anorexia nervosa, enteral nutrition role, 404
Antibiotic drugs, catheter infections treated with, home parenteral nutrition patients, 143
Antiglutamine, tumor stabilization by, during total parenteral nutrition, rat, 122
Apolipoprotein, transfer, after fat emulsion, 381
Arachidonic acid, parenteral administration, prevention of stress-induced erosive gastritis, rat, 615
Arginine
  role in trauma, sepsis, and immunity, 226S
  supplementation, established peritonitis, guinea pig, 237
Artificial nutrition, liver function test abnormalities, total enteral *vs* total parenteral, 618
Atherosclerosis, lipid emulsion effect, 223S
Azelaic acid, short-term infusion, comparison, Intralipid, healthy subjects, 169

Bacteria
  translocation
    after oral total parenteral nutrition, mice, 442
    effect of chemically defined liquid diet, rat, 1
    effect of enteral vs parenteral route, 170S
Biliary drainage, internal, total parenteral nutrition and, colon anastomosis healing, rat, 629
Bioelectrical impedance, body composition measured with, clinical evaluation, 129
Body composition
  bioelectrical impedance analysis for, clinical evaluation, 129
  effect of home total parenteral nutrition, AIDS patients, 454
Bone loss, progressive, during long-term home total parenteral nutrition, 139
Bone marrow
  transplant
    complications, Hickman right-atrial catheters, 27
    leucine kinetics in, 480
Book reviews, 104, 222, 325, 431, 548, 664
Bowel disease, inflammatory, liver function test abnormalities, artificial nutrition patients, 618
Bowel function
  dietary fiber and, long-term tube-fed patients, 508
  long-term, dietary fiber and, enterally nourished nonambulatory profoundly retarded youth, 371
Bowel obstruction, by Foley catheter, jejunostomy patient, 660
Bromide, serum concentrations, after coronary bypass operation, 85
Bulk, prevention of bacterial translocation by, oral total parenteral nutrition, mice, 442
Burn patients
  energy requirements, calculation by new formula, 115
  enteral nutrition
    assessment, three dietary regimens, letters, 660
    comparison, 3 dietary regimens, 225
    differential effects, letter, 665
  increased energy expenditure in, measurement, indirect calorimetry, 649
Butyrate, metabolic and intestinal effects, 181S

Cachexia
  dietary intake and, AIDS patients, 605
  nutritional support in the cancer patient, 244S
Calcium
  role in immune function and life span, 230S
  urinary loss, small bowel resection-associated, long-term parenteral nutrition, rat, 64
Calorimetry
  indirect
    accuracy, effect of tracheal gas leak, dog, 408
    increased energy expenditure, burn patients, 649
Cancer, resting metabolic rate, localized esophageal carcinoma, 119
Carbohydrate, comparison, low, medium, and high formulas, nighttime enteral feeding, cystic fibrosis, 47
Carbon dioxide
  production
    measurement, compact instrument evaluation, 216
    measurement, metabolic monitor comparison study, 259
Cardiomyopathy, selenium deficiency and, letters, 433
Carnitine
  effect on nitrogen metabolism, stressed rat, 134
  intravenous, effect on growth parameters, total parenteral nutrition, neonate, 448
  plasma concentrations
    association with lysine, prolonged total parenteral nutrition, 255
    rapid spectrophotometric determination, 527
  supplementation, enterally fed population, 270
Casein, gastrointestinal side effects, comparison, soy hydrolysate formula, 265
Catheter
  central venous
    arrhythmia incidence, 152
    new placement technique, infants and small children, 662
    occlusion, tissue plasminogen activator for, 310
    percutaneous, evaluation, very low-birth weight neonates, 295
    repositioning, letter, 107
    superior vena caval obstruction, home parenteral nutrition patients, 474
    superior vena cava thrombosis due to, 31
    tunneled, efficacy, thrombolytic therapy, 312
  cuffed central venous, early displacement prevention technique, 546
  decontamination, conventional and nonconventional vancomycin therapy, 593
  Foley, distension, intestinal obstruction by, jejunostomy patient, 660
  Hickman right-atrial, complications, marrow transplant patients, 27
  home parenteral nutrition, complications, pediatric patients, 148

hyperalimentation in critical care, comparison, pulmonary artery versus triple lumen, 588
occlusion, ethanol solution for, letters, 551
Cerebral palsy, enteral feeding, growth response to, pediatric patients, 23
Chemiluminescence
elemental nitrogen measured by, 195
measurement of elemental nitrogen by, letters, 669
Chemotaxis, cord blood neutrophils, reduction by preincubation with intravenous lipid emulsion, 472
Cholesterol, supplementation, growth and metabolism response, term infant, 392
Chromium, contamination, total parenteral nutrition solutions, 610
Cirrhosis, liver transplantation in patients with, nutritional support after, 386
Colon
anastomosis healing, internal biliary drainage, parenteral nutrition and, rat, 629
healing, effect of intravenous ketone bodies, rat, 245
Copper
role in immune function and life span, 230S
serum concentrations
after coronary bypass operation, 85
sepsis and surgery effect, 287
Cori cycle, contribution to plasma glucose appearance, 646
Coronary bypass, serum iron, zinc, copper, selenium and bromide concentrations after, 85
Critical care unit: *see* Intensive care unit
Cyproheptadine, effect on spontaneous food intake, rat, 497
Cysteine, metabolic availability, all-in-one total parenteral nutrition mixture, 177
Cystic fibrosis, nighttime enteral feedings, comparison, low, medium, and high carbohydrate, 47

Defined formula, glutamine or fiber supplementation, impact on bacterial translocation, rat, 335
Diarrhea
chronic, dietary nucleotide effect on intestinal repair, rat, 598
enteral feeding-related, microorganisms and, intensive care unit patients, 622
Dicarboxylic acids, medium-chain, evaluation as calorie source, healthy subjects, 169
Diet, immune function and health related to, 230S
Dipeptide, glutamine-containing, parenteral nutrition, 118S
Dysphagia, nutritional support, methods, risks, complications, 60

Endotoxin
retention, evaluation, inline intravenous filter, 56
susceptibility, supplementation of defined formula diets and, rat, 335
Energy
balance, postoperative, femoral fracture, elderly patients, 563
levels, health and life span related to, 230S
metabolism, biosynthetic human growth hormone effect, intravenous nutrition patients, 437
substrate, nonglucose, effect on nitrogen metabolism, stressed rat, 134
Energy expenditure
measurement
new formula for, burn patients, 115
resting metabolic rate as model for, esophageal carcinoma patients, 119
metabolic, measurement, indirect calorimetry, 649
resting
chronic obstructive lung disease, 7
esophageal carcinoma patient, letters, 550
effect on nitrogen metabolism, stressed rat, 134
Enteral nutrition
advantages and drawbacks, anorexia nervosa, 404
assessment of three dietary regimens, burn patients, letter, 660
bowel function, formulae with and without dietary fiber, 508
comparison, 3 dietary regimens, burn patients, 225
comparison, low, medium, high carbohydrate, nighttime feedings, cystic fibrosis patients, 47
continuous, pneumonia caused by, ventilated ICU patients, 353
differential effects, burn patients, letters, 665
drug metabolism during, effects of formula composition, rat, 34
early postoperative period, comparison, total parenteral nutrition, 501
effect of phenytoin suspension combined with, 275
feeding formula microbe-related diarrhea, intensive care unit patients, 622
gastric contractile response, menstrual cycle factors related to, 634
gastrointestinal side effects, comparison, 2 feeding formulas, 265
growth response to, children with cerebral palsy, 23
home, all-in-one modular formula, 173
large bowel response, dietary fiber and, nonambulatory profoundly retarded youth, 371
nasogastric administration, phenytoin absorption and, 513
serum albumin effect, hypoalbuminemic patient, 362
translocation incidence and severity influenced by, 170S
Enteral product, protein quality and lysine bioavailability, effect of heat processing and storage, rat, 68
Enteritis, radiation, glutamine nutrition, rat, 106S
Enterocolitis, experimentally induced, effect of glutamine-enriched diets, 100S

Fat
infusion, effect on platelet concentration, premature infant, 165
metabolism, intravenous carnitine effect, total parenteral nutrition, neonate, 448
Fat emulsion
bolus injection, apolipoprotein transfer after, 381
clearance, Hausmann lipid 20% and Lipovenös 20%, 82
continuous infusion, apolipoprotein transfer during, 381
effect on prothrombin time, warfarin anticoagulated patients, 201
intravenous, effect on measurement of reticuloendothelial system function, guinea pig, 463
parenteral infusion, reticuloendothelial system function and, 467
Fatty acids
adipose tissue, infants receiving total parenteral nutrition, 42
dietary polyunsaturated, effects on membrane composition and eicosanoid generation, 200S
free: *see* Free fatty acid
short-chain, metabolic and intestinal effects, 181S
Feeding tube
flexible nasogastric, tip malposition, letter, 108
occlusion
unclogging with pancreatic enzyme, 198
unclogging with pancreatic enzyme, letters, 668
Fiber
dietary, addition to liquid formula diets, review, 204
enteral formula, bowel function and, long-term tube-fed patients, 508
long-term large bowel response, enterally nourished nonambulatory profoundly retarded youth, 371
prevention of bacterial translocation by, oral total parenteral nutrition, mice, 442
supplementation, defined formula diet, rat, 335
Filter, inline intravenous, endotoxin retention capabilities, 56
5-Fluorouracil, supplementation, protein-deprived rat, 490
Foley catheter: *see* Catheter
Food intake, spontaneous, tryptophan and cyproheptadine effect, rat, 497
Free fatty acid, metabolism, effect of intravenous glycerol infusion, 162
Fructose, exogenous, metabolism, insulin role, 535

Gastritis, erosive, stress induced, prevention, parenteral arachidonic acid, rat, 615
Gastrointestinal disease, catheter-related complications, home parenteral nutrition, pediatric patients, 148
Gastrointestinal tract, glutamine metabolism, animal studies, 45S
Gastrostomy, percutaneous endoscopic vs surgical method, 533
Gentamicin, *in vivo* availability, total nutrient admixture, comparative study, 523
Geriatrics, femoral neck fracture, postoperative energy balance, 563
Gluconeogenesis, contribution of recycled glucose to, 646
Glucose, plasma, appearance, Cori cycle contribution to, 646
Glutamine
addition to total parenteral nutrition, tumor growth and, 86S
as anabolic effector, 130S

-containing dipeptides, parenteral nutrition, 118S
-containing substrate, parenteral nutrition, metabolic basis for selection, 114S
-enriched diet, experimentally induced enterocolitis, 100S
hepatic metabolism, 56S
hepatic transport, characteristics and regulation, rat, 51S
interorgan flow, after surgery and infection, 90S
interorgan metabolism, during acidosis, 77S
intestinal metabolism, animal studies, 45S
metabolism
during starvation, dog, 71S
lung, animal and human studies, 68S
metabolism and physiology, 40S
muscular deficiency, prognostic value, sepsis, 130S
nutrition and requirements, experimental animals, 94S
release from muscle, implications, immune system, 63S
safety and metabolic effects, normal volunteers and catabolic patients, 137S
supplementation
defined formula diet, rat, 335
during catabolic diseases, 237S
gut immunology and, 109S
treatment of radiation enteritis, rat, 106S
Glycerol, intravenous infusion, effect on free fatty acid metabolism, 162
Growth
effect of intravenous carnitine, during total parenteral nutrition, neonate, 448
effect of taurine and cholesterol supplementation, term infant, 392
Growth hormone
biosynthetic, effect on protein and energy metabolism, intravenous nutrition patients, 437
combined with nutritional support, critical care unit, 574
Gut
atrophy, during parenteral alimentation, urogastrone effect, rat, 283
*see also* Intestine

Healing, postsurgical, effect of early nutritional support, rat, 357
Heart, arrhythmia, central venous catheter insertion and exchange, 152
Human disease
advances in molecular biology and physiology, 157S
effects of nutritional intervention, 164S
Hyperalimentation
critical care setting, central catheter-related infections, 588
tumor and host response, rat, 122
Hypermetabolism, nutritional support, ICU patients, 257S
Hypoalbuminemia, enteral feeding intolerance, serum albumin levels and, 362
Hypophosphatemia, in refeeding syndrome, recognition and prevention, 90

Imipenem-cilastatin sodium, chemical stability, total parenteral nutrient solution, 306
Immune system
arginine role, 226S
dietary protein manipulation and, effect on Pseudomonas infection, mouse, 366
glutamine release from muscle and, 63S
perioperative nutritional support and, 186S
Immunoglobulin, synthesis, inhibition by intravenous lipid emulsion, 459
Immunoregulation, lipid-induced, 223S
Indirect calorimetry, portable metabolic cart systems, validation and comparison, 259
Infant formula, aluminum accumulation, tissue, premature infants, letters, 106
Infection
catheter-related
antibiotic therapy, home parenteral nutrition patients, 143
pulmonary artery versus triple lumen, hyperalimentation in critical care, 588
interorgan glutamine flow after, 90S
Infusion apparatus, vitamin A sorption to, polyvinyl versus polyolefin, 79
Injury
alterations in protein metabolism after, 555
burn: *see* Burn patients
Insulin
availability, total parenteral nutrition solution, 262
role, exogenous fructose metabolism, 535
Insulin-like growth factor, related to growth hormone, very low birth weight infants, 657
Intensive care unit
enteral feeding-related diarrhea, microorganisms and, 622
human growth hormone administration, 574
hyperalimentation, central catheter-related infections, 588
nutritional and metabolic support, 257S
Interleukin-2, lymphocyte response to, effect of lipid emulsions, 12
International glutamine symposium, introduction, 39S
Intestine
development, dietary nucleotide effect, chronic diarrhea, rat, 598
drug metabolism, formula composition effect, enteral nutrition, rat, 34
immunology, glutamine-supplemented diet effect, 109S
structure and function, effect of glutamine or fiber supplementation, defined formula diet, rat, 335
Intralipid, inhibition of immunoglobulin synthesis by, 459
Intravenous nutrition, biosynthetic human growth hormone effect on protein and energy metabolism, 437
Iron
role in immune function and life span, 230S
serum concentrations
after coronary bypass operation, 85
sepsis and surgery effect, 287

Jaundice, total parenteral nutrition, manganese toxicity during, 428
Jejunostomy, intestinal obstruction by distension of Foley catheter, 660

Ketone bodies, infusion, after colon anastomosis, rat, 245
Kupffer cell, interaction with hepatocytes, brief overview, 175S

Letters to editor, 106, 223, 433, 550, 665
Leucine, infusion, protein metabolism assessed by, bone marrow transplantation, 480
Lipid
effect on prostaglandin $E_2$ and thromboxane $B_2$ production, splenic macrophages, rat, 250
emulsion
effect on vascular disease, 223S
hemodynamic and vascular permeability effects, isolated canine lung lobe, 376
intravenous, inhibition of immunoglobulin synthesis by, 459
optimal utilization, intensive care unit, 223S
pharmacological concentrations
pharmacological concentrations, interleukin-2 responses inhibited by, 12
preincubation with, reduced chemotaxis of cord blood neutrophils by, 472
peroxidation, suppression by vitamin E, smokers, 300
Liquid diet
chemically defined, effect on intestinal microflora, rat, 1
dietary fiber addition, review article, 204
Liver
drug metabolism, formula composition effect, enteral nutrition, rat, 34
failure, branched-chain-enriched amino acid solutions, 249S
glutamine metabolism, 56S
glutamine transport, characteristics and regulation, rat, 51S
Kupffer cell-hepatocyte interactions, brief overview, 175S
mitochondrial function, alterations during total parenteral nutrition, immature rat, 640
transplantation, nutritional support after, 386
Liver function test, abnormalities, artificially fed inflammatory bowel disease patients, 618
Lung
chronic obstructive disease, metabolic rate and weight loss, 7
glutamine metabolism, animal and human studies, 68S

parenteral lipid emulsion effect, isolated canine lung lobe, 376
role in maintaining amino acid homeostasis, rat, 569
Lysine
bioavailability, heat processing and storage effect, enteral product, rat, 68
plasma levels, association, carnitine levels, prolonged total parenteral nutrition, 255

Macrophage
activation, dietary nucleotide effect, mice, 18
splenic, prostaglandin $E_2$ and thromboxane $B_2$ production, high lipid diet effect, 250
Magnesium, role in immune function and life span, 230S
Malnutrition
AIDS-related, effect of home total parenteral nutrition, 454
assessment of, 193S
dysphagic patient, methods, risks, and treatment complications, 60
energy expenditure in, esophageal carcinoma patients, 119
home enteral nutrition system, 173
immune responses impaired by, 186S
nutritional support in the cancer patient, 244S
Manganese
role in immune function and life span, 230S
toxicity, in long-term total parenteral nutrition patient, 428
Mechanical ventilation
continuous enteral feeding and, pneumonia incidence, ICU patients, 353
exercise physiology and nutritional support for, clinical application, 538
Menstrual cycle, gastric responses to enteral feeding and, 634
Mental retardation, constipation and fecal impaction, dietary fiber effect, enterally nourished nonambulatory youth, 371
Metabolic rate
chronic obstructive lung disease, 7
measurement, instrument evaluation, 216
resting, as model for energy expenditure measurement, esophageal carcinoma patients, 119
Metabolic status, underlying mechanisms, nutritional management and, 148S
Metabolism
effect of taurine and cholesterol supplementation, term infant, 392
regulation, role of phospholipid/arachidonic acid second messenger system, 416
Microflora, intestinal, effect of chemically defined liquid diet, rat, 1
Minerals, trace, surgery and sepsis effect, 287
Multivitamin, hypersensitivity, total parenteral nutrition-related, 213
Muscle
glutamine release from, implications, immune system, 63S
skeletal: *see* Skeletal muscle

Nandrolone decanoate, effect on plasma amino acids and nitrogen metabolism, polytrauma patients, 111
Nasogastric feeding, continuous, pneumonia caused by, ventilated ICU patients, 353
Nasogastric tube, enteral feeding through, decreased phenytoin absorption and, 513
Natural killer cell, dietary nucleotide effect, weanling mice, 18
Neutrophil, chemotaxis, reduction by preincubation with intravenous lipid emulsion, cord blood, 472
Nitrogen
balance, twenty-four hour determination, reliability, parenterally fed neonate, 53
elemental
measurement by chemiluminescence, 195
measurement by chemiluminescence, letters, 669
metabolism
glutamine infusion effect, protein catabolic conditions, 130S
nonglucose substrate effect, stressed rat, 134
renal losses, anabolic steroids and, polytrauma patients, 111
Nortriptyline, absorption, short bowel syndrome, 326
Nucleic acid, labeling, parenteral amino acids and, protein-deprived rat, 490
Nucleotide
dietary
effect on intestinal repair, chronic diarrhea, rat, 598
effect on natural killer cell activity and macrophage activation, mice, 18
Nutrition
free radicals, arachidonic acid metabolites and, 218S
status
assessment of, 193S
correlation with dietary intake, AIDS patients, 605
undernutrition index, use of internal validity in construct of, 582
Nutritional support
cancer patient, 244S
clinical application, ventilator-dependent patients, 538
clinical biochemistry overview, 148S
during pregnancy, total peripheral parenteral nutrition, 485
dysphagic patient, methods, risks, complications, 60
human growth hormone combined with, critical care unit, 574
pediatric cancer, review article, 315
perioperative
immunologic defects, 186S
justification for, 197S

L-2-Oxo-thiazolidine-4-carboxylic acid, metabolic availability, all-in-one total parenteral nutrition mixture, 177
Oxygen
consumption
compact instrument evaluation, 216
metabolic monitor comparison study, 259

Pancreas, exocrine, glutamine effect, rat, 344
Pancreatic enzyme, activated solution, unclogging feeding tubes with, 198
Parenteral nutrition
allergic reaction to, case report, pediatric patient, 98
ampicillin pharmacokinetics during, 279
glutamine-containing dipeptides in, 118S
glutamine-containing substrates for, metabolic basis, 114S
glutamine-enriched, effect on exocrine pancreas, rat, 344
gut atrophy during, urogastrone effect, rat, 283
home
antibiotic therapy of catheter infections, 143
catheter-related complications, pediatric patients, 148
efficacy, thrombolytic therapy, long-term catheters, 312
superior vena caval obstruction in gut failure patients, 474
ketone bodies, after colon anastomosis, rat, 245
low birth weight infants, comparison, enteral nutrition, 657
medium-chain triglyceride emulsion, seizure control maintained by, pediatric patient, 543
nitrogen balance, reliability, 24-hour determinations, neonate, 53
recent advances, presidential address, 329
short bowel syndrome, nortriptyline absorption, 326
technique and regimen, newborn rabbit, 101
three-in-one, safety and cost, infants, 290
total
admixture, L-2-oxo-thiazolidine-4-carboxylic acid as source of cysteine in, rat, 177
after liver transplant, cirrhotic patients, 386
branched-chain amino acid effect on injured rats, 156
central catheter-related infections, critical care setting, 588
central venous catheter morbidity, 31
chromium contamination, 610
comparison, semi-elemental formula, early postoperative period, 501
early postoperative, effect on healing, rat, 357
endotoxin retention by inline intravenous filters, 56
fat emulsion infusion and reticuloendothelial system function, 467
fatty acid composition of adipocyte membrane phospholipids, infants, 42
glutamine and tumor growth, 86S
hepatic mitochondrial function alterations during, immature rat, 640
home, effect on body composition in AIDS patients, 454
home, progressive bone loss during, 139
hypersensitivity, case report, 213
imipenem-cilastatin sodium stability, 306
intravenous carnitive effect on growth, neonate, 448
jaundice, internal biliary drainage and, rat, 629

long-term, small bowel resection-associated urinary calcium loss, rat, 64
manganese toxicity, case report and literature review, 428
oral administration, prevention of bacterial translocation induced by, mice, 442
refeeding syndrome, review, 90
selenium stability, letters, 223
sepsis incidence, 39
serum vitamin A and E requirements, pediatric patients, 189
solution, insulin availability, 262
solution, insulin recovery from, letter, 434
tracer measurement of reticuloendothelial system function, 463
tumor stabilization by acivicin during, rat, 122
total peripheral, evaluation, pregnant patients, 485
total prolonged, low plasma carnitine levels, 255
tryptohan and cyproheptadine effect on food intake, rat, 497
very low birth weight infants, evaluation, percutaneous central venous catheter, 295
Pediatrics
aluminum accumulation, lung, premature infants, letters, 106
cancer, nutritional needs, review, 315
central venous access, new technique, 662
cerebral palsy, enteral feeding, growth response to, 23
cord blood neutrophils, chemotaxis reduction by preincubation with intravenous lipid emulsion, 472
fat infusion, effect on platelet concentration, premature infants, 165
gastrointestinal disease, catheter-related complications, home parenteral nutrition, 148
height measurement, plastic devices for, letter, 552
intravenous nutrition technique, neonatal rabbit, 101
parenteral nutrition
allergic reaction to, case report, 98
reliability, 24-hour nitrogen balance, neonate, 53
three-in-one, safety and cost, infants, 290
seizure, control, medium-chain triglyceride emulsion for, 543
taurine and cholesterol supplementation, growth and metabolism response, infant, 392
total parenteral nutrition
fatty acid composition of membrane phospholipids in infants receiving, 42
hepatic mitochondrial function alterations during, immature rat, 640
intravenous carnitine effect on growth parameters, neonate, 448
serum vitamin A and E requirements, 189
very low birth weight infant, evaluation, percutaneous central venous catheter, 295
very low birth weight twins, nutritional and hormonal status, 657
vitamin A sorption, polyvinyl and polyolefin intravenous tubing, neonate, 79
Pelvis, irradiation, glutamine nutrition therapy, rat, 106S
Peritonitis, arginine supplementation effect, guinea pig, 237
pH
effect on equilibrium dialysis of phenytoin suspension, with and without enteral feeding formula, 275
gastric, pneumonia incidence related to, ventilated ICU patients with continuous enteral feeding, 353
Phenytoin
decreased absorption, enteral feeding through nasogastric tubes, 513
suspension, equilibrium dialysis, pH effect, with and without enteral feeding formula, 275
Phospholipids, adipocyte membrane, fatty acid composition, infants receiving total parenteral nutrition, 42
Platelet, concentration, fat infusion effect, premature infant, 165
Pneumonia, continuous enteral feeding and, ventilated ICU patients, 353
Pneumothorax, delayed, after subclavian vein catheterization, 414
Pregnancy, total peripheral parenteral nutrition during, efficacy and patient tolerance, 485
Propionate, metabolic and intestinal effects, 181S
Prostaglandin $E_2$, production by splenic macrophages, high lipid diet effect, rat, 250
Protein
balance, postoperative, femoral fracture, elderly patients, 563
catabolism, optimum branched-chain amino acid concentration for, stressed rats, 398
deprivation, parenteral amino acids and nucleic acid labeling, rat, 490
dietary manipulation, infection outcome after, mouse, 366
metabolism
assessment, leucine infusion, bone marrow transplantation, 480
biosynthetic human growth hormone effect, intravenous nutrition patients, 437
hormonal regulation, 555
measurement by chemiluminescence, 195
posttraumatic, glutamine role, skeletal muscle, 125S
quality, heat processing and storage effect, enteral product, rat, 68
Prothrombin time, fat emulsion effects, warfarin-anticoagulated patients, 201
Pseudomonas, intraperitoneal infection, effect of dietary protein manipulation, mouse, 366

Reabilan HN, nutritional efficacy and cost effectiveness, early postoperative period, 501
Refeeding syndrome
prophylactic and therapeutic guidelines, letters, 667
recognition and prevention, review article, 90
reduced activity of glyceraldehyde 3-phosphate dehydrogenase, letters, 552
Reticuloendothelial system
infusion of fat emulsions and function of, 467
tracer and intravenous fat emulsion effect on function measurement, guinea pig, 463

Second messenger system, phospholipid/arachidonic acid, metabolic regulation and, 416
Seizure, control by parenteral medium-chain triglyceride emulsion, pediatric patient with intractable diarrhea, 543
Selenium
deficiency, cardiomyopathy associated with, letters, 433
serum concentrations, after coronary bypass operation, 85
stability, total parenteral nutrition solutions, letters, 223
supplementation, enterally fed population, 270
Sepsis
arginine role, 226S
arginine supplementation effect, guinea pig, 237
during total parenteral nutrition, 39
effect on serum levels of trace minerals, 287
imipenem-cilastatin sodium therapy, chemical stability, total parenteral nutrient solution, 306
protein catabolism during, optimum branched-chain amino acid concentrations for treatment of, rat, 398
Short bowel syndrome, nortriptyline absorption, 326
Skeletal muscle
posttraumatic protein and amino acid metabolism, glutamine role, 125S
role in maintaining amino acid homeostasis, rat, 569
Skin, hypersensitive reaction, total parenteral nutrition-related, 213
Small bowel, resection, urinary calcium loss after, long-term parenteral nutrition, rat, 64
Smoking, increased lipid peroxidation, vitamin E effect, 300
Snowbird Conference on Nutritional Pharmacology, introduction, 147S
Soy hydrolysate, gastrointestinal side effects, comparison, casein formula, 265
Spectrophotometry, plasma carnitine concentrations determined by, 527
*Staphylococcus epidermis*, catheter contamination by, conventional and nonconventional vancomycin therapy, 593
Starvation, glutamine metabolism during, dog, 71S
Steroids, anabolic, effect on renal nitrogen and amino acid losses, polytrauma patients, 111
Stress
-induced erosive gastritis, prevention, parenteral arachidonic acid, rat, 615
protein catabolism during, optimum branched-chain amino acid concentrations for treatment of, rat, 398
Subclavian vein, catheterization, delayed pneumothorax after, 414
Superior vena cava
occlusion, gut failure patients receiving home parenteral nutrition, 474
thrombosis, complication of central venous catheter, 31

Surgery
  early total parenteral nutrition after, effect on skin wound and colon anastomosis healing, rat, 357
  effect on serum levels of trace minerals, 287
  effect on serum trace elements, coronary bypass operation, 85
  interorgan glutamine flow after, 90S
  postoperative energy balance, femoral fracture, elderly patients, 563
  protein-energy undernutrition and, index development, 582

Taurine
  content, common foodstuffs, 183
  supplementation
    enterally fed population, 270
    growth and metabolism response, term infant, 392
Technetium sulfur colloid, reticuloendothelial system measured by, total parenteral nutrition, guinea pig, 463
Thrombolytic therapy
  efficacy, occluded long-term catheters, 312
  tissue plasminogen activator for, occluded central venous catheters, 310
Thromboxane $B_2$, production by splenic macrophages, high lipid diet effect, rat, 250
Tissue plasminogen activator, occluded central venous catheters, investigational use, 310
Tocopherol: *see* Vitamin E
Total nitrogen loss, estimation, method comparison, hospitalized patients, 517
Trauma
  amino acid infusion, optimal branched-chain amino acid concentration, rat, 156
  arginine role, 226S
  protein and amino acid metabolism after, glutamine role, skeletal muscle, 125S
  renal nitrogen and amino acid losses, nandrolone decanoate effect, 111
  *see also* Injury
Triglyceride
  long- and medium-chain, parenteral infusion, reticuloendothelial system function and, 467
  long-chain, comparison, azelaic acid, healthy subjects, 169
  medium chain, parenteral emulsion, seizure control by, pediatric patient, 543
  stored, fatty acid composition, infants receiving total parenteral nutrition, 42
Tryptophan, effect on spontaneous food intake, rat, 497
Tube
  endotracheal, gas leak, effect on indirect calorimetry measurement, dog, 408
  intravenous, vitamin A sorption to, 79

Undernutrition, protein-energy, internal validity used in index of, 582
Urogastrone, effect on gut atrophy, during parenteral alimentation, rat, 283

Vancomycin, conventional versus nonconventional therapy, *Staphylococcus* contaminated catheter, 593
Venipuncture, subclavian, delayed pneumothorax after, 414
Venous access device, totally implantable, complication of, letter, 107
Ventilator weaning, exercise physiology and nutritional support, clinical application, 538
Vitamin, preparation, allergic reaction to, parenteral nutrition formula, pediatric patient, 98
Vitamin A
  requirements, total parenteral nutrition, pediatric patients, 189
  sorption, comparison, polyvinyl and polyolefin intravenous tubing, 79
Vitamin E
  blood and tissue levels, after intraperitoneal alpha-tocopheryl acetate, rat, 74
  increased lipid peroxidation suppressed by, cigarette smokers, 300
  requirements, total parenteral nutrition, pediatric patients, 189

Warfarin, anticoagulation, fat emulsion effects on prothrombin time in patients with, 201
Weight loss, chronic obstructive lung disease, 7

Zinc
  role in immune function and life span, 230S
  serum concentrations
    after coronary bypass operation, 85
    sepsis and surgery effect, 287
